Dear Editor,

We have taken aboard your minor revision comments by adding coordinates and localities to the following figures/figure captions and an added supplementary material section (longitude lattitude coordinates) to accommodate this without adding to the actual paper length needlessly.

> Figures 4, 8 and 10 now have coordinates. Longitude latitude coordinates of localities in figures 6 and 7 are added in supplementary material, and reference made in the figure captions.

(!) Please note that we have added a zip file with **high quality versions of all the figures**. We would urge to please use a vectorised form of the figures (pdf in the zip). A tiff version is also included, mainly to provide a visual check with what we intend the vector/pdf figure to look like in finalized version.

Many thanks for the help with the manuscript and editorial handling.

Kind regards,

Koen (in name of the authors)
