Received and published: 27 March 2020

TO THE REVIEWERS We, the authors, appreciate the valuable arguments and contributions for the improvement of the article: Soil-landscape relationship in sandstone-gneiss topolithosequence in the Amazonas state, Brazil. We have communicated that all the suggestions have been adhered to and we hope that they will be able to attend to the publication. Discussion 3: I would like to request correction in the organic carbon values of the work, as they are very high. Answer: It was accepted and modified in the text.

Discussion3: In addition, it is necessary to place the soil classification in the WRB.
