Received and published: 11 December 2019

Dear authors,

After evaluation of your commentary paper, I agree with the reviewers, who indicated that your manuscript should not be published as it stands right now. Therefore I do not recommend revision but rejection at this step.

In my opinion, you should re-work your paper towards original research paper, showing new data and more pieces of evidence on this topic, not restricting yourself to the reinterpretation of Polom et al. work. I encourage you to consider submitting your new manuscript to Solid Earth.

Best regards, Dr Michal Malinowski SE Topical Editor
