Interactive comment on "Hydro-mechanical processes and their influence on the stimulation effected volume: Observations from a decameter-scale hydraulic stimulation project" *by* Hannes Krietsch et al.

David Healy (Editor)

d.healy@abdn.ac.uk

Received and published: 18 May 2020

Dear authors

following the reviewers comments and your response, please now submit a revised ms.

Noting the reviewers comments regarding the organisation and length of the original ms, and your response to say you will reorganise and shorten the new version, we will probably ask for a further review once your changes are made.

Printer-friendly version

Discussion paper

Please provide a detailed response document, outlining your specific response and any changes made to each of the reviewer comments.

All the best Dave Healy Topical Editor
