Received and published: 22 June 2019

We thank the reviewer for the comments and corrections. In the revised version of the manuscript we reported the used magma viscosity value (see also Table 1) calculated internally by the numerical model. We made all corrections indicated: we changed the name “transient regime” into “unstable regime” in Appendix A2-A3 (frame a), and we corrected the value of concentration of the dissolved gas (5-6 wt%) in Table 1. Please find attached the revised version of the manuscript with the marked changes.

On behalf of the authors, Sincerely, Silvia Massaro
