Interactive comment on "Comment on "Estimating the depth and evolution of intrusions at resurgent calderas: Los Humeros (Mexico)" by Urbani et al. (2020)" *by* Gianluca Norini and Gianluca Groppelli

Luca Ferrari (Referee)

luca@unam.mx

The comment is well written and illustrated. The authors discuss their disagreement with the model proposed by Urbani et al. (2020) in four sections, providing strong arguments and field-based evidences that show their detailed knowledge of the geology of the area. The style is polite and the arguments are fully backed by graphical material and/or references. Accordingly, I consider that the comment can be published as is.
