The paper in its original version has been seen and evaluated by two reviewers who independently recommended publication of the comment on scientific grounds. As both Executive and Handling Editor I asked for the comment paper to be resubmitted after toning down some of the wording. This has now happened and I have no additional criticisms that would prevent the publication of this comment. The authors of "Estimating the depth and evolution of intrusions at resurgent calderas: Los Humeros (Mexico)" by Urbani et al (2020) will now have the opportunity to respond to the comment.
