

Editors of Solid Earth

Dear Editors,

Please find enclosed the corrected version of the paper entitled: "The enigmatic curvature of Central Iberia and its puzzling kinematics.", co-authored by Daniel Pastor-Galán, Gabriel Gutiérrez-Alonso and Arlo B. Weil to be considered in Solid Earth.

We have followed the topical editor comments. As a note, Leite Mendes et al., is accepted (under a minor iteration of corrections, right now). It does not have the final DOI yet, we have provided in the mean-time the EarthArXiv DOI. We hope the final DOI of the paper will be available soon, during the production of this manuscript.

Sincerely,

Daniel Pastor Galán on behalf of all co-authors
