Thank you for providing a comment and some suggestions on our paper. As you have suggested, we have included the suggested paper (Smeraglia et al., 2018) in our discussion. We found this paper very interesting and insightful, as well as quite consistent with what we interpret for the Hurricane fault.

Also, based on your comment as well as from another reviewer, we have moved some of the images from the supplemental information into the main text (as a new figure) to provide context.
