Received and published: 1 April 2020

The presentation "Similarities and differences of microseism and microbarom source regions reconstructed from the seismo-acoustic Kazakhstani network" is available online at the <https://meetingorganizer.copernicus.org/EGU2020/EGU2020-2965.html>. It covers the same issues as the paper and also some advantages in the microseism simulation.
