Dear Editor, thanks very much for the final acceptance of our manuscript! We are uploading the final files, with just a slight change that was already announced during the review process. We are opening (it will be operational tomorrow) a public repository to freely distribute the Matlab® App, with a user-friendly graphical user interface, that we developed to perform this analysis. The code will be available for download on a public repository at https://github.com/bistek/DomStudioFracStat1D, that is referenced as DOI:10.5281/zenodo.4122291. We changed the text accordingly at lines 189-190 and in the acknowledgments.

Thank you very much!

With kind regards,

Andrea Bistacchi, Università degli Studi di Milano - Bicocca
